### The company's remuneration guidelines: scope, purpose and deviations

A prerequisite for the successful implementation of the company's business strategy and safeguarding of its long-term interests, including its sustainability, is that the company is able to recruit and retain qualified personnel. To this end, it is necessary that the company offers competitive remuneration. The company's remuneration guidelines enable the company to offer executives a competitive total remuneration. Under the remuneration guidelines, executive remuneration shall be on market terms and may consist of the following components: fixed remuneration, variable remuneration, other benefits and pension. The variable remuneration shall be based on the outcome of predetermined financial and operational targets. Variable remuneration shall be based on the fulfilment of the company's targets for project results and value growth divided in personal targets for the financial year. The terms and conditions and basis of computation of variable remuneration shall be determined for each financial year. The targets promote the company's business strategy, long-term interests and sustainability by linking the remuneration to senior executives to the company's project- and growth development.

The guidelines are found on pages 26-27 in the annual report 2022. During 2022, the company has complied with the applicable remuneration guidelines adopted by the general meeting. No deviations from the guidelines have been decided and no derogations from the

procedure for implementation of the guidelines have been made. The auditor's report regarding the company's compliance with the guidelines is available on <https://abliva.com/investors/corporate-governance/>. No remuneration has been reclaimed. In addition to remuneration covered by the remuneration guidelines, the annual general meeting 2021 resolved to implement a stock option program for the company's CEO.
